

8" PASSIVE CEILING SPEAKER

DISCREET DESIGN. SERIOUS PERFORMANCE.

The Lithe Audio 8" Passive Ceiling Speaker is a high-performance in-ceiling solution designed to integrate seamlessly into wired audio systems. Engineered for both residential and commercial installations, it delivers powerful, balanced sound with a premium 2-way driver configuration.

FEATURES

High-Performance 2-Way Design

8" graphite woofer cone with 1" directional tweeter delivers balanced, full-range audio.

80W RMS Power Handling

Designed to handle high output with clarity for both residential and commercial spaces.

Optimised for Stereo Pairing

Perfectly matches with Lithe Audio active speakers or amplifiers for left/right channel setups.

Wide Frequency Response

Covers 35Hz – 23kHz for deep bass and crisp high frequencies.

High Sensitivity (91dB)

Efficient performance with excellent volume output from minimal power.

Low-Profile, Discreet Design

Magnetic, frameless grille for a clean architectural finish.

Paintable Finish

Grille can be spray painted to match any ceiling or interior design.

Fire-Rated ABS Chassis

Durable construction suitable for modern building requirements.

IP44 Rated

Suitable for bathrooms (Zone 2 & 3) and humid environments.
