

LC90 CM90-SERIES TRACKING FEATURES LICENSE

TRACKING FEATURES

The AV-LC90-1 Single Camera Tracking License is designed for our CM90 series 4K60 PTZ Cameras. Powered by advanced AI, it offers multiple tracking modes for seamless, autonomous tracking with precision—eliminating manual adjustments. Perfect for lectures, recordings, and live engagements, it ensures professional-grade production without extra personnel. Unlock effortless tracking and experience the transformative power of AI with the AV-LC90-1 today.

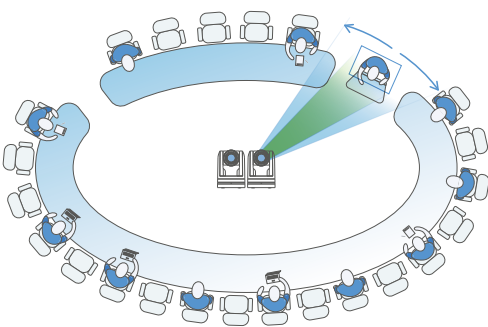

Dynamic Tracking

The CM93 Presenter Mode smoothly follows presenters, keeping audiences engaged.

Customizable Zoom Options: Choose between close-up, mid-shot, or wide shot for the perfect view of your speaker.

Adjustable Boundaries: Set custom pan and tilt limits to keep the camera focused on stage.

Automatic Reset: When the presenter exits, the camera returns to a preset position, ready for the next moment.

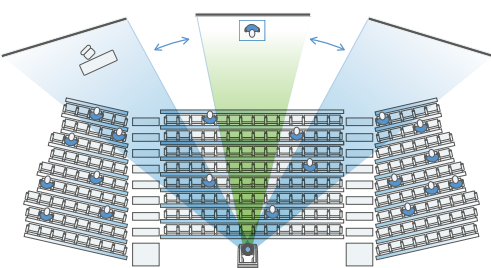

Hybrid Tracking

Combines free movement tracking with smart, fixed zones for focused presentations.

Zone Focus: Set zones like a whiteboard where the camera stays fixed as the presenter explains.

Seamless Transitions: Camera returns to free tracking once the presenter leaves the set zone.

Custom Zoom & Boundaries: Choose from close-up, mid-shot, or wide shot; set pan and tilt limits for optimal focus.

Conference Tracking Mode

Automatically captures delegates in formal settings like COP conferences, G20 summits, and parliamentary sessions.

Automatic Activation: Starts when the delegate's microphone is activated, focusing the camera on them.

Smooth Tracking: Maintains steady, subtle tracking without zoom adjustments for a natural, unobtrusive view.

Hands-Free Operation: No technician needed—ensuring reliable, professional coverage for any conference.
