X-DOCK PRO

SUPERIO CD-321EA-PRO is a USB-C docking station featuring one USB-C input and two HDMI outputs, supporting resolutions up to 4K60 4:4:4. Both HDMI outputs support MST and SST modes.

The docking station provides two USB-A ports and one USB-C port for peripheral devices, with data transfer speeds of up to 5Gbps. It also features advanced USB device power management with two selectable power modes.

CD-321EA-PRO offers easy EDID management for improved compatibility between source devices and displays. The integrated RJ45 Ethernet port provides network connectivity to the connected USB-C host, while USB-C Power Delivery allows simultaneous charging when a compatible power supply is connected.
